

Delivery via Terminal

1. Delivery via Terminal
2. Delivery via Terminal Options
3. Services view after adding "Delivery via Terminal"

1. Delivery via Terminal

Customer Order → Services → + → Delivery via Terminal

The screenshot shows a software interface for managing customer orders. At the top, there's a navigation bar with 'Klienta pasūtījums' and 'Kontrole'. Below that, there are several tabs: 'Pasūtījuma informācija', 'Pasūtītāja informācija', 'Pakalpojumi', and 'Izdevumi'. The 'Pakalpojumi' tab is active, showing a table of services. A dropdown menu is open, showing a list of service options. The option 'Piegāde caur terminālu' is highlighted. A red box and number '1' are around the '+' button that triggered the dropdown, and another red box and number '2' are around the selected option.

- Papildus kravu-1
- Papildus kravu-2
- Pievienot/Labot THC
- Pievienot degvielas piemaksu
- Pievienot mobilitātes pakas piemaksu
- Pievienot konteina piepildīšanas vietu

2. Delivery via Terminal Options

1. Select the required terminal; the address will be filled in automatically.

2. Split the route **EE11312 Tallinn → PL-02-158** into two parts.
3. Planned delivery deadline to the terminal.
4. Specify the amount allocated for the stage from the terminal to the delivery address.
5. If you know which truck will transport the cargo, you can create a new trip or add it to an existing trip.
6. Assign it to the department responsible for delivery from the terminal to the delivery address.

Piegāde caur terminālu

3. Services View After Adding "Delivery via Terminal"

The overall delivery process is divided into two stages, and each stage is assigned a specific amount:

1. Total amount to be received from the customer.
2. Revenue distributed among departments.
3. Departments responsible for specific delivery stages.

leņēmumi **1** 200 EUR EU Termiņš 30 days Sūtīt rēķ. Pa e-pastu (rēķins kopā...)

Rēķins Pasūtījumam rēķins nav izveidots!
