- Cargo Status
- SMS message to the driver
- CMR how to create and print it

How to select current orders?

1. In the **Client order** filter 
2. Check **Status** ☒
3. Select the desired order statuses
4. Close
5. Prepare the report

The screenshot shows the 'Client orders' filter dialog box. The interface includes a left sidebar with various filter categories, a main area with search and filter settings, and a right sidebar with additional filters. Red circles with numbers 1 through 5 highlight specific steps in the process:

- 1**: Points to the 'Client orders' title bar.
- 2**: Points to the 'Status' checkbox, which is checked.
- 3**: Points to the status selection dropdown menu, which is open, showing a list of statuses with checkboxes. The selected statuses are 'Confirmed', 'Problems', and 'Loaded'.
- 4**: Points to the 'Close' button at the bottom of the status selection dropdown.
- 5**: Points to the 'Prepare' button at the bottom right of the dialog.

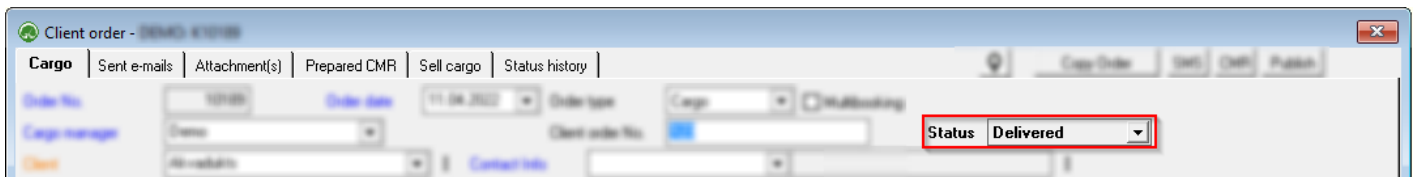

The status selection dropdown menu contains the following options:

- ☒ Confirmed
- ☐ Canceled
- ☒ Problems
- ☐ Terminal (in)
- ☐ Next load.adr.
- ☐ Approaching load.pl.
- ☐ Arrived load.pl.
- ☐ Sātkta ieraušana
- ☐ Next deli.adr.
- ☐ Approaching deliv.pl.
- ☐ Arrived deliv.pl.
- ☐ Sātkta izkraušana
- ☐ Terminal (out)
- ☒ Loaded
- ☐ Delivered

Cargo Status

The cargo status allows you to follow the progress of the order. The following Cargo statuses are distinguished:

1. **Confirmed** – There is an agreement with the client and the carrier that the cargo will be shipped;
2. **Problems** – There are some problems in the cargo delivery process;
3. **Loaded** – Cargo is on its way;
4. **Delivered** – this status can be entered manually but it will be set automatically when the actual date of the last delivery is passed;
5. **Paid** – An invoice has been issued and paid;
6. **Canceled** – The order has been cancelled.

The image shows a screenshot of a software window titled "Client order - 202401011000". The window has a tabbed interface with tabs for "Cargo", "Sent e-mails", "Attachment(s)", "Prepared CMR", "Sell cargo", and "Status history". The "Cargo" tab is selected. Below the tabs, there are several input fields and buttons. A "Status" dropdown menu is visible, with "Delivered" selected and highlighted by a red rectangular box. Other fields include "Order No.", "Order date", "Order type", "Cargo manager", "Client order No.", and "Contact info".

Information about the cargo status changes both manually and automatically depending on the settings in OZOLS TMS chosen by your company.

1. Automatically:

- Based on the car's location (by loading data from the car's GPS navigation system). More info [here](#) .
- Based on loading/delivery dates (Ozols or iOzols) entered by the manager.

2. Manually:

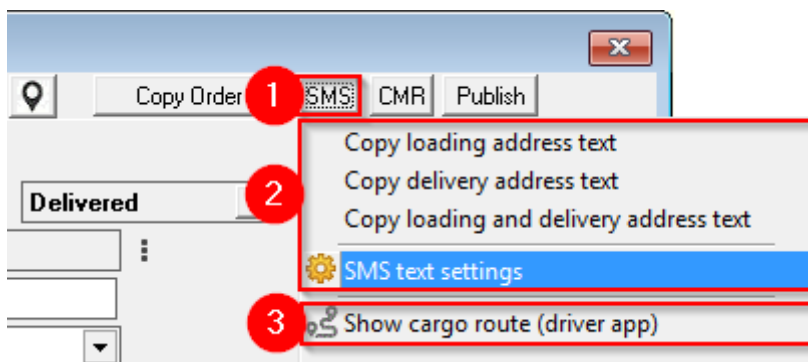

- The status can be set in the **Client order** window by clicking. 
- Through the driver's application ([MyOzols](#)), which can be used by both the driver and the manager of the carrier. More info [here](#)

SMS message to the driver

You can quickly send an **SMS to the driver with information about the cargo** from the Client's order and from the Trip/ Spedition windows.

- 1) **Client order** in the window on the upper right side, press the button " **SMS** "
Trip/Spedition in the window on the right side, press the button " **Functions** "
- 2) **Select** the necessary information for SMS
- 3) Send cargo information in the **Driver application (No installation of application is required!)**

1. SMS from the Customer's order window

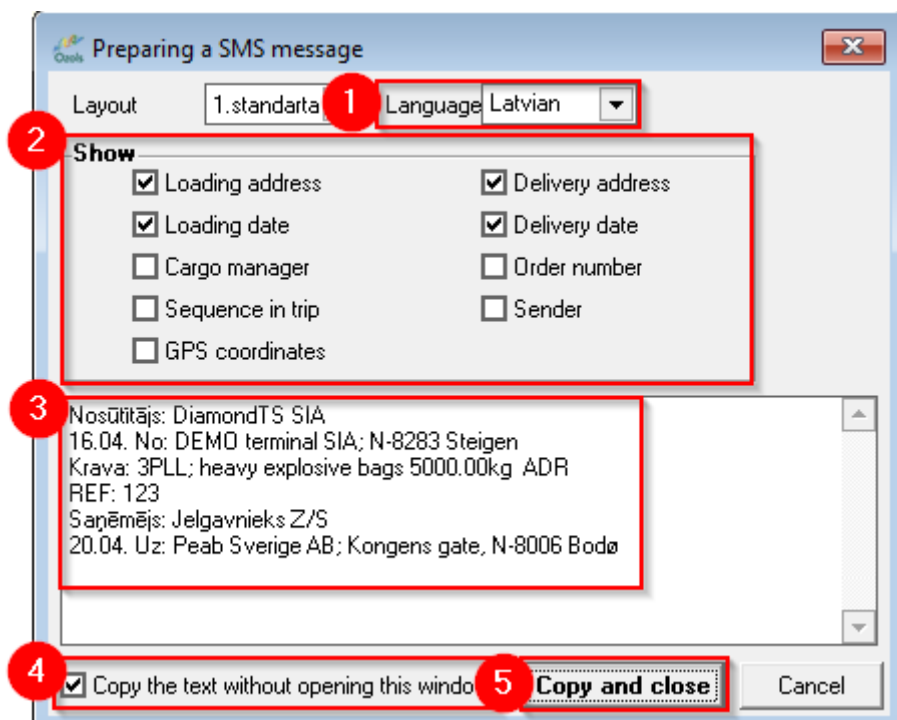

2. SMS from the Trip/Spedition window

3. SMS text settings

It is possible to customize the information that is sent to the driver:

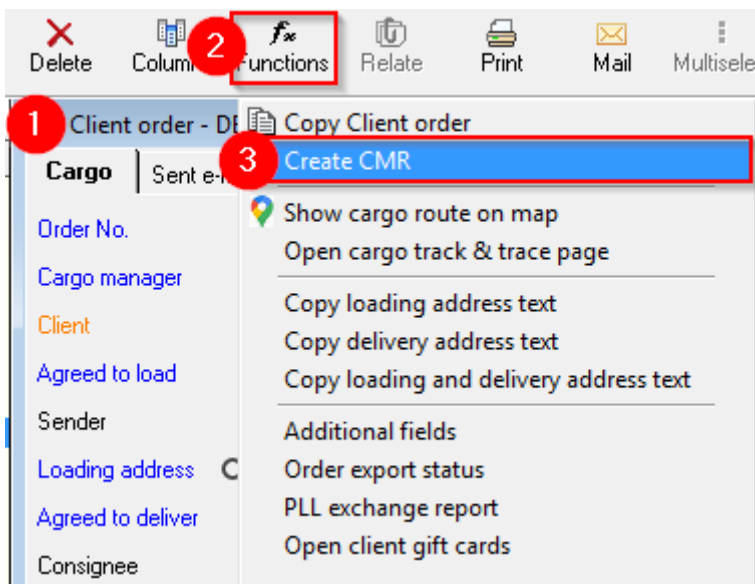

1. Language of the text message;
2. **Show:** what information to include;
3. Message text **preview** ;
4. Tick here to set as default and not reopen this window next time;
5. **Copy and close.** Freight delivery information has been copied. Open your desired application (whats-app etc.) and press "Paste" or ctrl+v to paste.

CMR how to create and print it

How to create and print the **CMR for the Client's order?**

1. Open the **Client's order** for which the CMR will be prepared
2. From the toolbar, select **Functions**
3. **Create CMR**

- Based on the Client's order information, the program automatically fills in the CMR fields

CMR
