

# 7) Unable to connect to OZOLS TMS

If by connecting to OZOLS TMS you encounter the message:

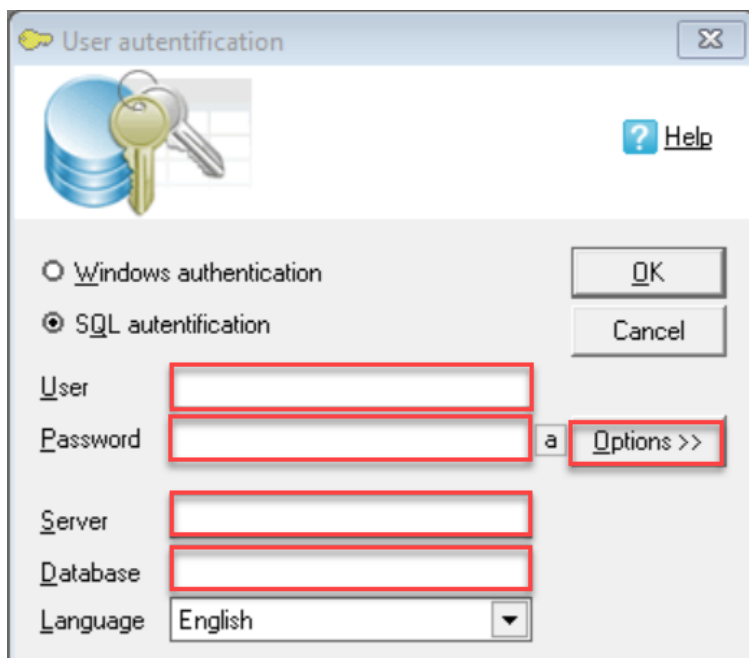

1. If the Notification waiting time is less than ~5 seconds:

Make sure you have entered the **User Name and Password correctly**.

2. If waiting time for Notification is more than ~5 seconds:

1. Press the "**Options <<**" button
2. Check if the **server name and database name** are entered correctly
3. Make sure the **internet connection** is working

The image shows a 'User authentication' dialog box. At the top left is a key icon and the title 'User authentication'. At the top right is a close button. Below the title is an icon of a database cylinder and keys. To the right of this icon is a 'Help' button. The main area contains two radio buttons: 'Windows authentication' (unselected) and 'SQL authentication' (selected). To the right of these are 'OK' and 'Cancel' buttons. Below the radio buttons are five input fields: 'User', 'Password', 'Server', 'Database', and 'Language'. The 'User', 'Password', 'Server', and 'Database' fields are empty and have red rectangular boxes drawn around them. The 'Language' field is a dropdown menu with 'English' selected. To the right of the 'Password' field is an 'Options >>' button, which also has a red rectangular box drawn around it.

If the above instructions have not solved the problem, please contact OZOLS TMS Customer Support at [info@cloudex.lv](mailto:info@cloudex.lv) or call +371 (283) 8 83 00
