

Cargo Status

The **cargo status** allows you to follow the progress of the order. The following Cargo statuses are distinguished:

1. **Confirmed** – There is an agreement with the client and the carrier that the cargo will be shipped;
2. **Problems** – There are some problems in the cargo delivery process;
3. **Loaded** – Cargo is on its way;
4. **Delivered** – this status can be entered manually but it will be set automatically when the actual date of the last delivery is passed;
5. **Paid** – An invoice has been issued and paid;
6. **Canceled** – The order has been cancelled.

The screenshot shows a software interface for managing client orders. The title bar reads 'Client order - 123456789'. Below the title bar, there are several tabs: 'Cargo', 'Sent e-mails', 'Attachment(s)', 'Prepared CMR', 'Sell cargo', and 'Status history'. The 'Cargo' tab is active. In the 'Cargo' tab, there are several input fields: 'Order No.' (123456), 'Order date' (11.08.2022), 'Order type' (Cargo), 'Cargo manager' (Darius), 'Client order No.' (123456), and 'Status' (Delivered). The 'Status' dropdown menu is highlighted with a red box.

Information about the cargo status changes both manually and automatically depending on the settings in OZOLS TMS chosen by your company.

1. Automatically:

- Based on the car's location (by loading data from the car's GPS navigation system). More info [here](#).
- Based on loading/delivery dates (Ozols or iOzols) entered by the manager.

2. Manually:

- The status can be set in the **Client order** window by clicking. 
- Through the driver's application ([MyOzols](#)), which can be used by both the driver and the manager of the carrier. More info [here](#)
