

Type of transport

You can specify the **type of transport in client's order**. It can be added or edited.

OZOLS > Freight forwarding > Lists > Transport types

The screenshot shows the OZOLS software interface for managing transport types. The top toolbar includes buttons for 'New' (2) and 'Delete'. The left sidebar shows a tree view with 'Vehicle types' (1) selected under 'Lists'. The main area displays a table of transport types.

Name	Truck	notes
Auto		
Konteineri	x	
Mega	x	
Platforma	x	
REF	x	fafafs
TENT	x	wde

The 'New - Vehicle type' dialog box (3) is open, showing the 'Name' field with 'Box trailer' and a 'Save' button (4).
