

# Transporta tips

**Klienta pasūtījumā** ir iespējams norādīt **transporta tipu**. To ir iespējams gan pievienot, gan rediģēt.

## OZOLS > Kravu pārvadājumi > Saraksti > Transporta tipi

The screenshot displays the OZOLS application interface. The top menu bar includes options like 'Dati', 'Teksts', 'Dokumenti', 'Atskaites', 'Saraksti', 'Izlase', 'Konfigurācija', 'Logs', and 'Palīgs(?)'. Below this is a toolbar with icons for 'Pārļūks', 'Atpakaļ', 'Uz priekšu', 'Pievienot' (Add), 'Apstiprināt', 'Filtrs', 'Dzēst' (Delete), 'Kolonnas', 'Funkcijas', 'Saistīt', 'Drukāt', 'Mail', 'Multi iez.', and 'Skats'.

The left sidebar shows a tree view of the application structure. Under 'Kravu pārvadājumi' (Cargo Transport), the 'Transporta tipi' (Transport Types) option is highlighted with a red circle 1.

The main window displays a table of transport types. The table has columns for 'Nosaukums' (Name), 'Kravas telpa' (Cargo Space), and 'notes' (Notes). The table lists several types: 'Auto', 'Konteineri', 'Mega', 'Platforma', 'REF', and 'TENT'. The 'Auto' type is selected, and its details are shown in the 'Jauns - Transporta tips' dialog box.

The dialog box 'Jauns - Transporta tips' (New - Transport Type) contains the following fields:

- Nosaukums: Box trailer
- LDM: [Empty field]
- Ref.: Nav Ref
- Ref.st.norma: [Empty field]
- Piezīmes: box trailer small

The dialog box also includes a checkbox for 'Piekabe' (Trailer) and buttons for 'Saglabāt' (Save) and 'Atcelt' (Cancel). The 'Saglabāt' button is highlighted with a red circle 4.
